Sample Photo / Actual Range Style May Vary.

OPERATION INSTRUCTIONS

1. Plug unit into a 120V electrical outlet. (Unit will not operate without electricity)
 2. Connect propane tank per the tank instructions.
 3. Open the main propane tank valve and allow 2-5 min. for propane to fill the fuel line.
 4. Turn the GAS switch to the ON position.
 5. Set the COOL DOWN switch to the auto position.
 6. Turn THERMOSTAT to the desired temperature.
 7. Set the BLOWER switch to the HI position.
 8. When the OVEN READY light goes out, load your product.
 9. Set the COOK TIMER.
 10. When the timer sounds, remove the product.
 11. If the next product requires a lower temperature, then cool down mode can be used. Set the BLOWER switch to the LOW position. Turn the COOL DOWN Switch to the MAN position. Make sure that the door is open.
 12. Turn the oven off by setting the BLOWER switch to the OFF position.
 13. Shut off the propane tank's main cylinder valve.
- ** In the event of a shut down of any kind, allow a five (5) minute shut off period before attempting to restart the oven.
